

Participant Information Sheet

专家评审参与者信息说明

DRAFT - NOT ETHICS-CONFIRMED

草案 - 尚未确认属于伦理批准版本

Study	POLIS: An AI-Enabled Decision-Support System for Equitable Green Infrastructure Planning
Application	11000110520260706104327
Document	Participant Information Sheet / 参与者信息说明
Status	DRAFT - NOT ETHICS-CONFIRMED
Version date	4 August 2026

1. Invitation and purpose

1. 邀请与研究目的

You are invited to take part in an independent expert review of anonymised green-space planning outputs. The study evaluates whether POLIS produces designs that professionals judge to be responsive to stated needs, spatially coherent, feasible, equitable, and well integrated. The human-participant component consists only of expert ratings; residents and members of the public are not recruited.

诚邀您参加一项针对匿名绿色空间规划输出的独立专家评审。本研究评估专业人士是否认为 POLIS 生成的设计能够回应既定需求、具有空间连贯性、可实施性、公平性和整体整合性。本研究涉及人的部分仅为专家评分，不招募居民或普通公众。

2. Why have I been invited?

2. 为什么邀请我？

The study recruits 8-12 professional or academic experts in urban planning, landscape architecture, green-infrastructure design, or urban spatial analysis. You must have at least three years of relevant professional or research experience, or a relevant postgraduate qualification with practice experience; be able to give informed consent; and be able to complete the task in English or Chinese. POLIS developers, direct project collaborators, and people with a material conflict of interest are not eligible.

本研究招募 8-12 名城市规划、景观建筑、绿色基础设施设计或城市空间分析领域的专业或学术专家。您须具有至少三年相关专业或研究经验，或具有相关研究生学历及实践经验；能够作出知情同意；并能够使用中文或英文完成任务。POLIS 开发团队成员、项目直接合作者以及存在重大利益冲突者不能参加。

3. What will I do?

3. 我需要做什么？

After reading this sheet, you will complete an active online consent form before any data are collected. On Wenjuanxing, you will provide your role, sector, and years of experience; review a randomised, condition-blind sequence of anonymised rendered plans and short specifications; score each assigned design on five seven-point criteria; make forced-choice preferences for selected pairs; and may leave an optional comment. You will not be told which workflow produced a design. The target allocation is nine scenarios (27 intervention outputs) per reviewer. The session is expected to take 30-60 minutes, may be paused and resumed, and has no follow-up.

阅读本说明后，您须先完成主动勾选式在线同意，之后才会收集任何数据。您将在问卷星填写职业角色、行业和从业年限；以随机顺序查看经匿名化且隐藏生成条件的渲染平面图和简短说明；依据五个七点评分维度评价分配给您的设计；对指定设计对作强制二选一；并可选择填写评论。您不会被告知设计由哪种工作流生成。目标分配为每位评审 9 个情景（27 个干预输出）。任务预计需要 30-60 分钟，可以暂停后继续，不安排后续访谈。

4. Is participation voluntary?

4. 参加是否自愿？

Yes. Participation is voluntary and unpaid. Choosing not to participate, stopping the task, or withdrawing will not disadvantage you. You do not need to give a reason.

是。参加完全自愿且不提供报酬。拒绝参加、中途停止或退出不会给您带来不利影响，也无需说明理由。

5. Risks and benefits

5. 风险与获益

The study is low risk. Possible inconveniences include screen fatigue, professional self-consciousness, or concern that a judgement could be attributed to you. You may pause or stop. The study does not offer a direct personal benefit; it may improve evaluation of decision-support tools for green-infrastructure planning.

本研究风险较低。可能的不便包括屏幕疲劳、对专业判断产生顾虑，或担心评价可被追溯到个人。您可以暂停或停止。研究不承诺直接个人获益，但可能有助于改进绿色基础设施规划决策支持工具的评价方法。

6. What data will be collected?

6. 将收集哪些数据？

Direct identifiers are limited to your name and email for contact and consent. Low-sensitivity professional-background data are limited to role, sector, and years of experience. Research data comprise reviewer-coded ratings, forced-choice preferences, and any optional comment. No health, biometric, audio, video, photograph, or special-category personal data are collected.

直接身份信息仅限于联系和同意记录的姓名与邮箱。低敏感度职业背景数据仅限职业角色、行业和从业年限。研究数据包括以评审编号记录的评分、强制二选一结果和自愿评论。不收集健康、生物识别、音频、视频、照片或特殊类别个人信息。

7. Confidentiality and storage

7. 保密与存储

Ratings are pseudonymised with a reviewer code. The name/email-to-code linkage is stored separately on XJTLU BOX and is accessible only to PI John Moraros and student researcher Jiawei Tong. Wenjuanxing is used for transient collection on servers in Mainland China; responses are exported to XJTLU BOX and deleted from the platform after collection. Reports use aggregated, anonymised results and will not name individual reviewers.

评分通过评审编号进行假名化。姓名/邮箱与评审编号的对应表将与评分分开存放于 XJTLU BOX，仅 PI John Moraros 和学生研究者 Jiawei Tong

可访问。问卷星仅用于在中国大陆服务器上临时收集数据；收集结束后，数据将导出至 XJTLU BOX，并从平台删除。研究报告仅使用汇总、匿名化结果，不公布个别评审姓名。

8. Data transfer and AI

8. 数据跨境传输与人工智能

Pseudonymised, minimised reviewer-level data may be securely transferred to named research-team members in the United Kingdom for co-supervision. Direct identifiers will not be transferred. Transfer and storage are encrypted and use approved secure channels such as XJTLU BOX or SFTP. Participant ratings and comments will not be processed with generative AI or uploaded to generative-AI services.

为共同指导研究，经过假名化和最小化处理的评审层面数据可能安全传输给英国境内具名研究团队成员。直接身份信息不会跨境传输。传输和存储将加密，并使用 XJTLU BOX 或 SFTP

等获准安全渠道。参与者评分和评论不会使用生成式人工智能处理，也不会上传至生成式人工智能服务。

9. Retention, sharing, and withdrawal

9. 保存、共享与退出

Identifiable records, including consent records, are retained for three years after study completion and then securely deleted. Fully anonymised data may be deposited in OSF or Zenodo only if you give separate specific consent. You may request withdrawal of your identifiable data and linked ratings until anonymisation and aggregation, expected approximately two weeks after submission. After that point, the anonymous record can no longer be identified for removal.

包括同意记录在内的可识别资料将在研究完成后三年内保存，之后安全删除。只有在您另行明确同意的情况下，完全匿名化的数据才可能存入 OSF 或 Zenodo。在匿名化和汇总之前（预计提交后约两周内），您可以要求撤回身份信息和关联评分。完成匿名化后，研究团队将无法再识别并删除您的个体记录。

10. Results and contacts

10. 研究结果与联系方式

Results may appear in a peer-reviewed journal, the doctoral thesis, conferences, and an open repository. A plain-language summary is available on request. For study questions or withdrawal, contact Jiawei Tong at jiawei99@liverpool.ac.uk or PI John Moraros at John.Moraros@xjtlu.edu.cn. For concerns about participant rights or complaints, use the current XJTLU Research Ethics Review Panel contact channel stated in the final institutionally confirmed PIS.

研究结果可能发表于同行评议期刊、博士论文、学术会议和开放仓库。您可申请获取通俗版结果摘要。如需咨询研究或申请退出，请联系 Jiawei Tong (jiawei99@liverpool.ac.uk) 或 PI John Moraros (John.Moraros@xjtlu.edu.cn)。如对参与者权益或投诉程序有疑问，请使用经学校最终确认的 PIS 中所列西交利物浦大学研究伦理审查渠道。
